

In App Inventor, go to Projects and export the .aia file to your computer.

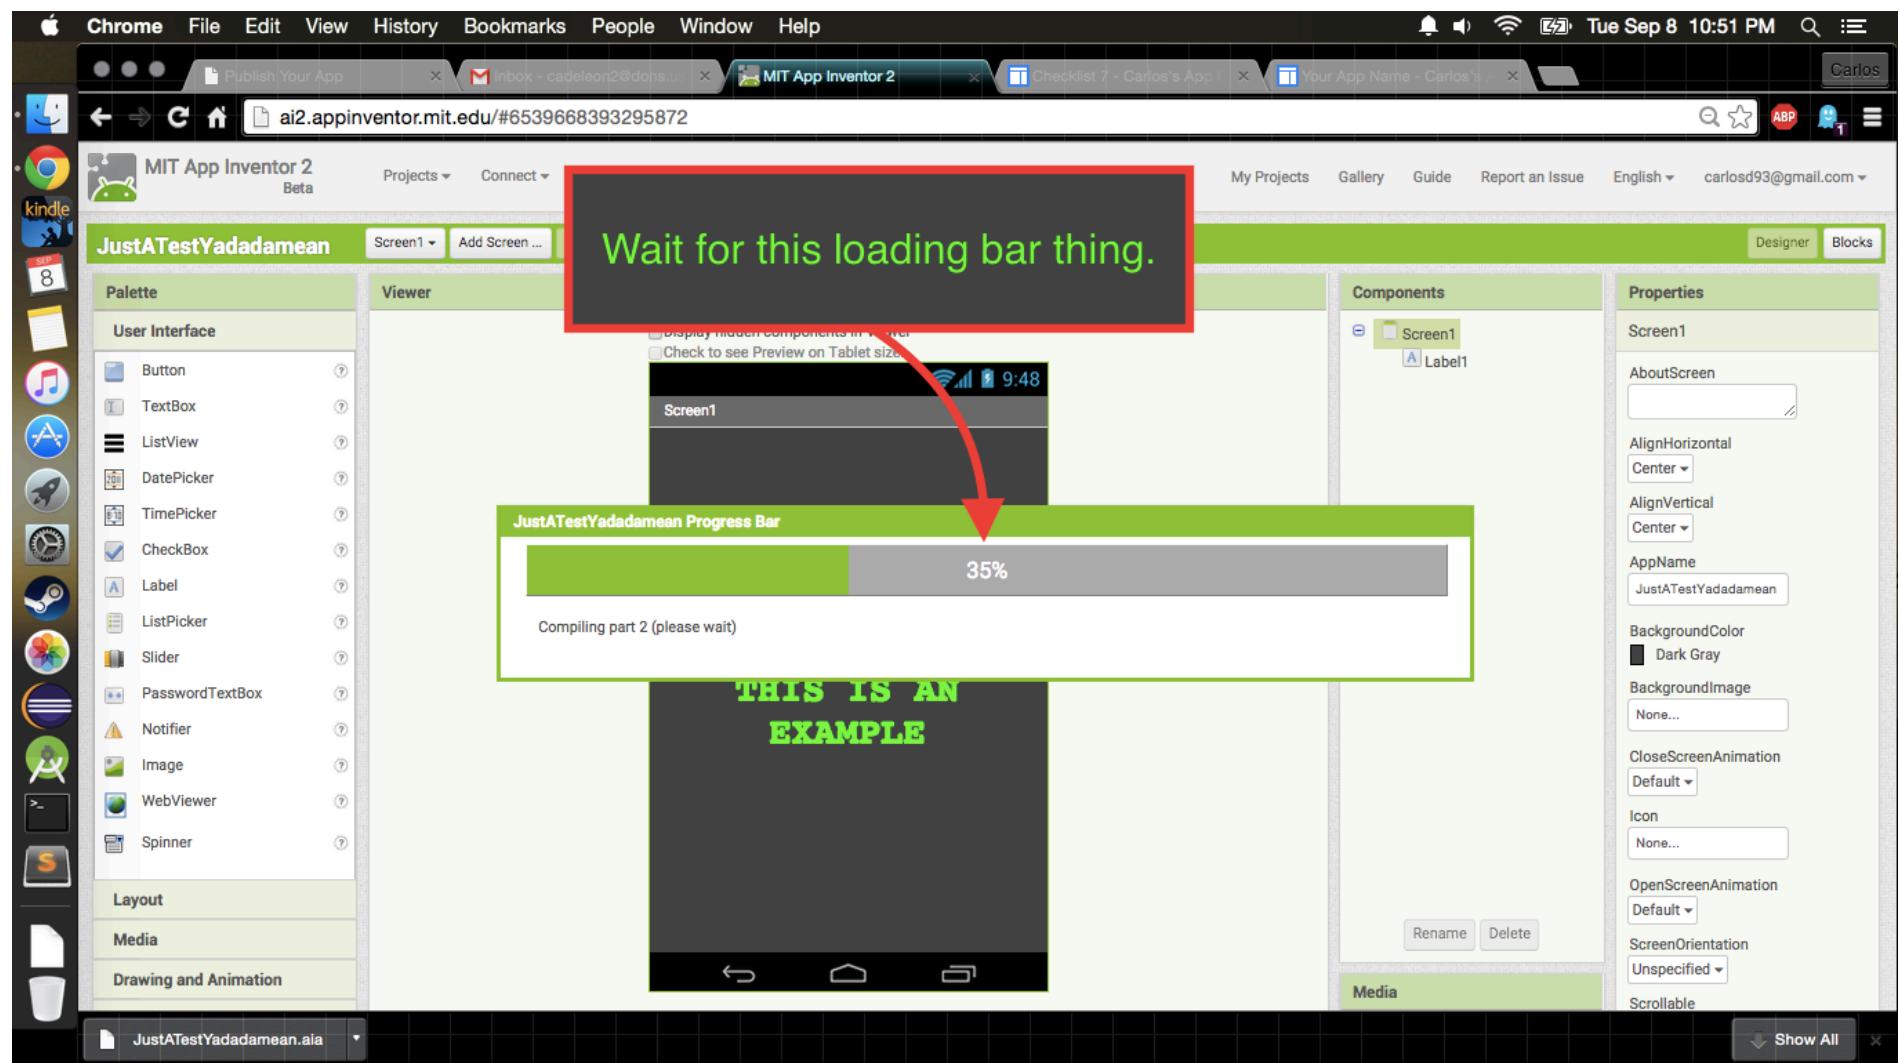

THIS IS AN EXAMPLE

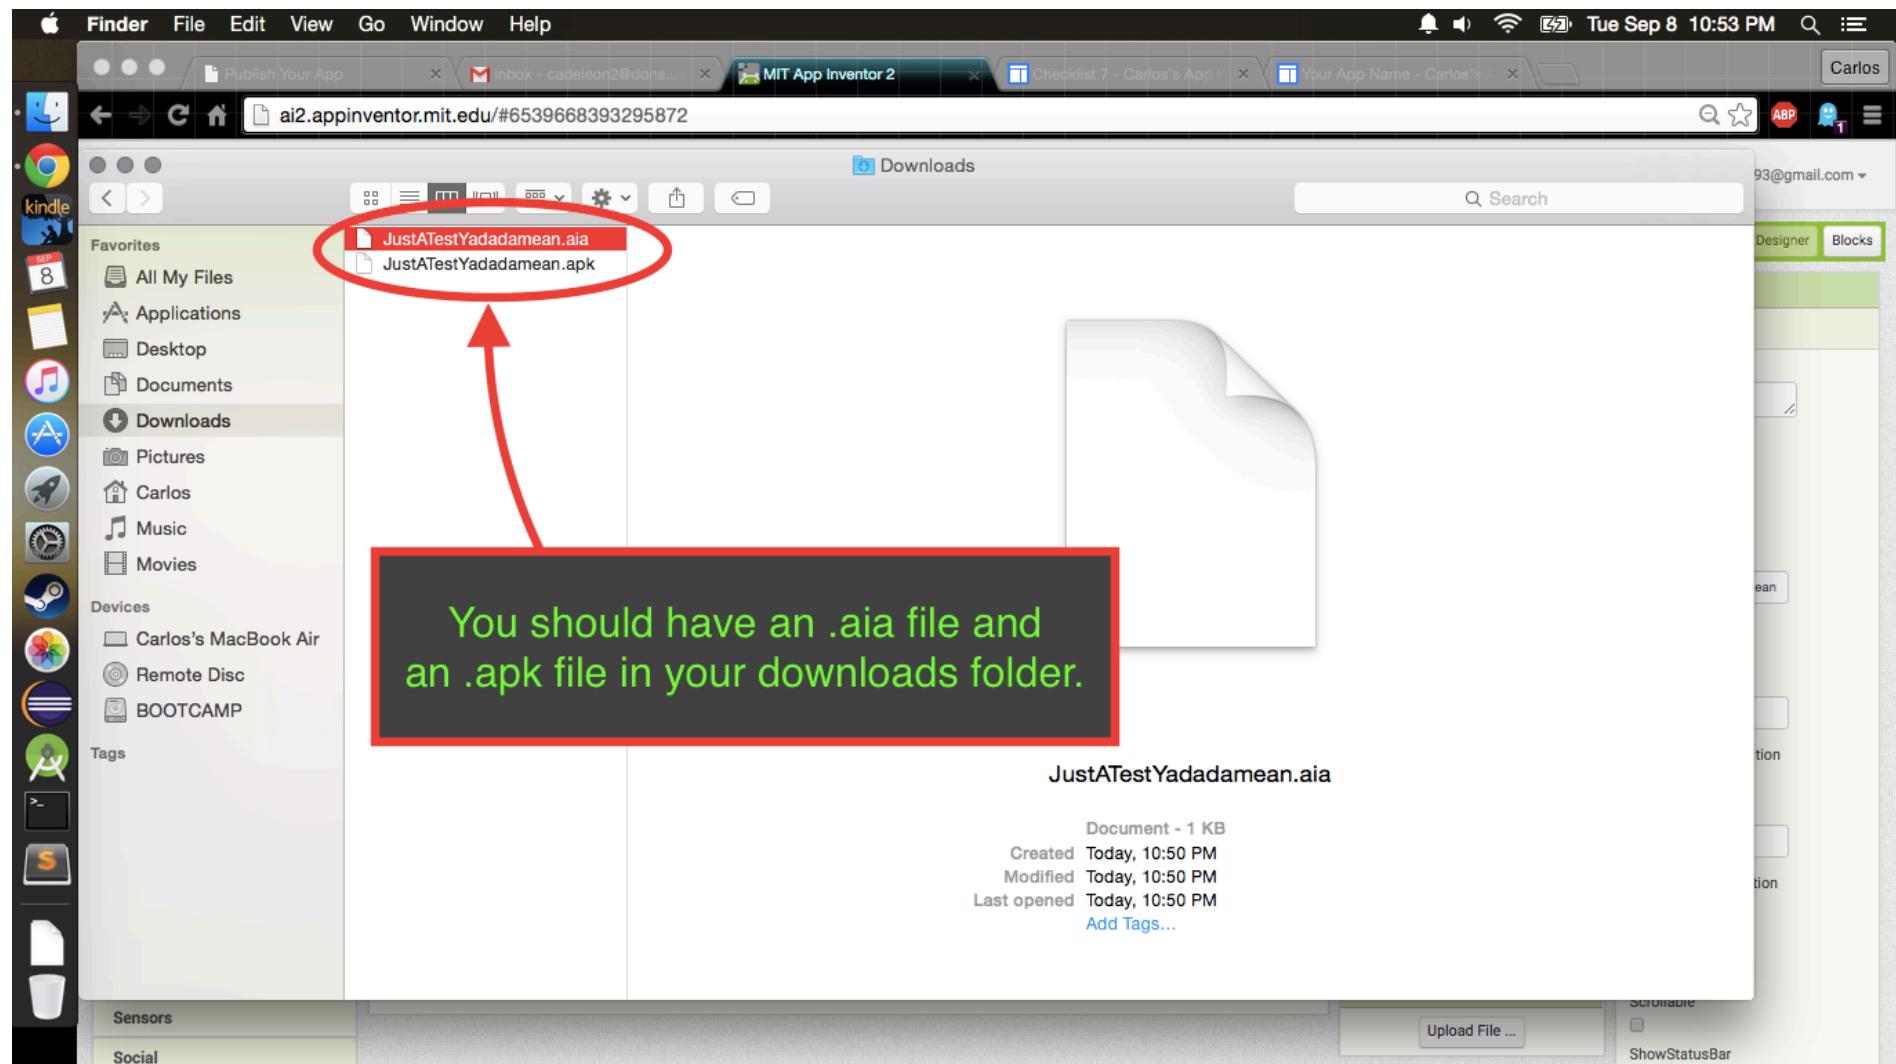

OR

If the app is on your partner's computer, have them send you the file.

The screenshot shows the MIT App Inventor 2 Designer interface. On the left is the 'Palette' with categories like User Interface, Layout, Media, etc. In the center is the 'Viewer' showing 'Screen1' with the text 'THIS IS AN EXAMPLE'. On the right are the properties for the current component, set to 'AppName: JustATestYadadamean'. At the top, a red arrow points from a callout box to the 'Build' dropdown menu, which is open to show the 'App (save.apk to my computer)' option. A large red box highlights this callout and the 'Build' menu item.

Then go to Build and save the .apk file to your computer.

▶ Choose a different location

Name it whatever your app is called.

Recent Site Activity | Report Abuse | Remove Access | Powered By Google Sites

The screenshot shows a Google Chrome window with multiple tabs open. The active tab is 'Create a new page - Carlos' on Google Sites. The interface for creating a new page is displayed, featuring a 'Name your page:' input field containing 'Your App Name', which is circled in red. A large red arrow points from this circled field to a text box on the right containing the instruction 'Name it whatever your app is called.' Below the input field, there are options to 'Select a template to use' (set to 'Web Page') and 'Select a location' (radio button selected for 'Put page at the top level'). At the bottom of the page creation interface, there are links for 'Recent Site Activity', 'Report Abuse', 'Remove Access', and 'Powered By Google Sites'. The left sidebar of the browser shows various application icons, and the top bar includes standard Mac OS X controls like volume and battery status.

Right click (or control click) on the blue down arrow next to the .APK file. Then copy the link address.

The screenshot shows a Google Sites editor window. On the left, there's a sidebar with various icons. The main area has a title 'Your App Name' and a toolbar with 'Insert', 'Format', 'Table', 'Layout', and 'Help' buttons. Below the toolbar is a rich text editor with a 'Normal' style and font size '10 pt'. To the right of the editor are 'SITEMAP' and 'CHECKLISTS' sections. In the center, there's a file upload section with a folder icon. Two files are listed: 'JUSTATESTYADADAME.N APK (1.46K)' and 'CARLOS DE LEON, SEP 8, 2015, 11:08 PM'. A red circle highlights the blue download arrow next to the APK file. A red box highlights the file name 'JUSTATESTYADADAME.N APK'. A red arrow points from the highlighted file to a context menu that is open over it. The context menu includes options like 'Open Link in New Tab', 'Copy Link Address' (which is highlighted), 'Copy', 'Search Google for 'd'', 'Print...', 'Inspect Element', 'Look Up in Dictionary', 'Speech', 'Search With Google', and 'Add to iTunes as a Spoken Track'. At the bottom of the page, there are links for 'Recent Site Activity', 'Report Abuse', 'Print Page', 'Remove Access', and 'Powered By Google Sites'.
